Siemens Mobile SMS Exceptional Character Vulnerability**Summary**

Siemens' Mobile phone supports SMS utilizing the [PDU standard](#). There is a bug in the mobile phone's display subroutine; whenever it tries to display special characters the mobile will shut down. In addition, since the SMS cannot be deleted without viewing it, thus it will remain on the phone without possibility of deleting it.

Details**Vulnerable systems:**

Siemens 3568i (Or below)

Exploit:

<http://www.benjurry.org/en/program/smsdos.zip>

Or,

<http://www.xfocus.org/download.php?id=10>

Solution:

Don't display SMS's you receive from strangers. If you receive such an SMS, you can delete it using the following computer program:

<http://www.benjurry.org/en/program/sms.zip>

Or,

<http://www.xfocus.org/download.php?id=11>

Solution:

SSMC (Siemens Shang Mobile Communication Ltd) say that the new software version 23 of 35 series (3508i,3518i & 3568i) already resolved this vulnerability.

Any one can update their software on the regional support center.
